## Wall vent TL80R

Artno 628080

- Three opening positions
- Condensation protection
- Controlled with or without cord
- Complete range of accessories
- Several filter alternatives

**Round wall vent designed to provide a continuous airflow into the building/house.**

### Technical data

Duct size nominal Ø (mm)	80
Material	Plastic
Plastic Material detail	ABS, PS
Etim Code	EC011497

---

## Description

Air supply unit for wall mounting. A complete set contain internal part, 2 x wall pipe, adapter and external grille. The pipes fit telescopically which provides a flexible join.

The internal part is supplied with standard filter and condensation protection. The front cover also functions as damper and is regulated either with a mounted cord or by pulling the cover outwards. The vent has three opening-positions and one close-position. The cover will gradually change position for each pull (the fourth pull will close the vent). The distribution pattern can be improved by

mounting an air deflector (accessory).

The vent has two filter-alternatives, Standard filter (included as standard) and Pollen filter (accessory).

Mounting, a high placing is recommended, preferably above a radiator. With this solution the incoming air mixes with the convection flow of warm air, ensuring maximum comfort. When using the vent in rooms with underfloor-heating we recommend to use an air deflector (ensures a better mix of air and prevents draught, accessory).
